Sarthak Paneru

sarthak.paneru007@gmail.com | sarthakpaneru.com.np | github.com/SarthakPaneru

Skills

Programming Languages: Java, Python, Bash
Frameworks & Tools: Spring Boot, Git, Docker, Flutter, Log4j, GitHub Actions, JUnit, , Jenkins
Database: MySQL, PostgreSQL, Sqlite
Platforms: AWS(ec2, ECS, RDS, S3, SQS, Lambda, SNS, SES, Secrets Manager, Cognito, Cloudwatch)
Others: RabbitMQ, API Design, Microservices Architecture, Performance Optimization

Experience

Mid-Senior Software Engineer, Pagoda Labs – Kupondole, Lalitpur Jan 2026 – Present

- Contributing to the modernization of a legacy Java 8 monolithic system toward Java 21 with microservices architecture, focusing on improving scalability, maintainability, and system performance
- Actively developing and enhancing core features in the existing Java 8 codebase, ensuring high code quality, backward compatibility, and smooth transition readiness for the upgraded architecture

Senior Software Engineer, Access Systems – Anamnagar, Kathmandu Aug 2025 – Dev 2025

- Led development of an internal platform managing client onboarding and complete project lifecycle visibility across company and client portfolios
- Collaborated cross-functionally to integrate project tracking, user management, and performance analytics into a unified dashboard
- Mentoried junior developers and ensuring adherence to scalable, modular, and testable code practice

Jr. Software Engineer, Access Systems – Anamnagar, Kathmandu Apr 2023 – Jul 2025

- Architected and developed Spring Boot microservices supporting **multi-tenant** environments for enterprise clients
- Led the design and implementation of an SLA compliance microservice using AWS SES, SNS, and SQS to process and persist inbound messages in Amazon RDS (MySQL)
- Re-engineered database schema, improving query performance and reducing API latency by over 60%
- Optimized a critical API endpoint by rewriting SQL queries, reducing response time from 10s to <300ms

Java Intern, Access Systems – Anamnagar, Kathmandu Jan 2023 – Mar 2023

- Strengthened Java fundamentals, including OOP, collections, and exception handling, applied in live coding tasks
- Built a Spring Boot REST API integrated with MySQL to demonstrate CRUD operations and API design principles
- Implemented DTOs to ensure separation between internal models and external contracts
- Integrated AWS S3 for file storage, enabling scalable upload/download capabilities

Projects

Barber Appointment Backend github.com/SarthakPaneru/Project-II

- Developed authentication using JWT tokens and implemented email functionality
- Implemented an optimized shortest-path algorithm to calculate the nearest barber location

UI for Barber Appointment github.com/SarthakPaneru/StyleSlate-Customer

- Integrated REST APIs in Flutter using the ‘http‘ package for dynamic data rendering
- Implemented secure token-based authentication flow for user login and session handling

Education

Nepal College of Information Technology – BE in Software Engineering 2019 – Present
